EDUCATION

University of Waterloo

Bachelor of Computer Science, Software Engineering Specialisation, 4A Term

Waterloo, Ontario

Sept 2021 – Apr 2026

- Relevant Coursework: Algorithms, Data Structures and Data Management, Artificial Intelligence

EXPERIENCE

Software Engineering Intern

Cactus Information Systems

Jan 2025 - Apr 2025

Malaysia

- Participated in system design meetings for a new production line information system, selecting an **MVVM architecture** and translating client requirements into structured development tasks.
- Designed and implemented interactive **WPF** forms with robust validation to efficiently retrieve and manage data from **MySQL** database, improving user experience and data accuracy.

Software Developer

Imagine Communications

May 2024 - Aug 2024

Waterloo, ON

- Built **Python** and **Selenium** automated testing frameworks, cutting regression testing time by **50%** and embedding testing into the development cycle.
- Maintained **Docker** containers and **Kubernetes** pods for the Versio Control broadcasting application, upgrading Docker versions to meet security standards.
- Configured **AWS EC2** AMIs to optimize system performance and reliability.

VP of Development, UW Data Science Club

University of Waterloo

Sept 2024 - Dec 2024

Waterloo, ON

- Led client-facing development of a **Next.js** QR code scanner application with **MongoDB** backend and **REST APIs**, streamlining event check-ins for **100+ participants**.
- Automated data validation with **Python** scripts to ensure data integrity across **MongoDB** and CSV sources.
- Maintained and updated a member-facing website serving **300+ users**.

PROJECTS

Stock Tracker App | *MongoDB, Express.js, React, Node.js*

June 2025

- Built a full-stack **MERN** web application allowing users to create and manage custom stock watchlists, persisting symbols in **MongoDB** via Mongoose and exposing RESTful CRUD endpoints with **Express.js**.
- Integrated third-party market data APIs (Polygon.io) to fetch real-time stock prices, changes, and percentages.
- Implemented a **60-second auto-refresh** and interactive **React** dashboards, improving engagement by **30%**

LinguaStream | *Python, Flask, React, Firebase*

May 2024

- Designed and developed the front-end of a web application capable of translating YouTube video audio into multiple languages, utilizing **React** and Chakra UI.
- Integrated front-end components with **Flask**-based backend services, ensuring seamless data transmission through thoroughly tested API endpoints via **Postman**.

MIPS Compiler | *C++, DFAs, Tokenising, Parsing*

Jan 2023 – Apr 2023

- Developed a robust compiler in **C++** to convert a high-level C-like programming language into optimized MIPS assembly, utilizing deterministic finite automata (**DFAs**) and regular language theory for efficient lexical analysis, parsing, and type checking.

TECHNICAL SKILLS

Languages: Python, C/C++, C#, SQL (Postgres), JavaScript, HTML/CSS

Frameworks: MongoDB, Express.js, React.js, Node.js, Flask

Developer Tools: Git, Docker, AWS, Postman, Visual Studio, Kubernetes, Visual Basic

Libraries: pandas, NumPy, Matplotlib, Selenium
